To install vuetify, you have to follow these steps above

1. In the terminal --> npm install vuetify
2. In the terminal --> npm install  sass sass-loader deepmerge -D
3. Then create à folder inside src --> plugins
4. Then create a file inside the folder and give him the name vuetify.js
5. Then in the file paste this code

```
import Vue from 'vue'
import Vuetify from 'vuetify'
import 'vuetify/dist/vuetify.min.css'

Vue.use(Vuetify)

const opts = {}

export default new Vuetify(opts)
```

6. Then in the file main.js the code will be like this

```
import Vue from 'vue'
import App from './App.vue'
import vuetify from '@/plugins/vuetify' // path to vuetify export

Vue.config.productionTip = false

new Vue({
  render: h => h(App),
  vuetify
}).$mount('#app')
```
